below 0.10
b
Neural rank of the intended character
rank = symbols scored higher by the neural posterior
Tied with the top symbol
4 (2.4%)
Neural runner-up (2nd)
98 (59.0%)
Third-ranked
35 (21.1%)
Fourth-ranked or worse
29 (17.5%)
0
50
100
Phantom-agreement selections (n = 166)
c
Neural margin from its own top choice
gap: neural top probability minus intended character's
Cumulative fraction of cases
1.0
0.8
