

### a Neural probability on the intended character

median 0.16, IQR 0.10-0.24 (bar at left)

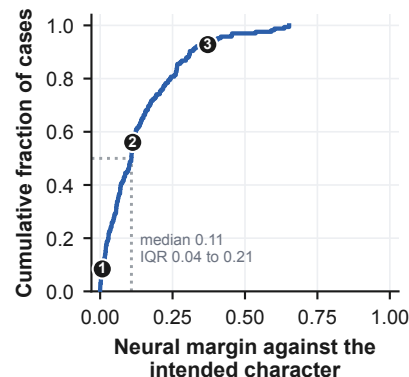

### b Neural rank of the intended character

rank = symbols scored higher by the neural posterior

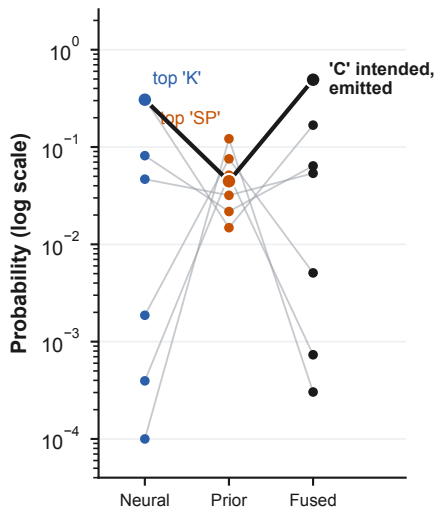

### c Neural margin from its own top choice

gap: neural top probability minus intended character's

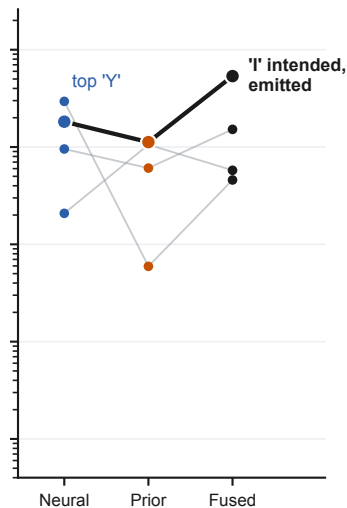

### d Representative prior-mediated reclassifications

#### 1 Near-tie: OFFICE

#### 2 Median case: REMAIN

#### 3 Strong conflict: USEFUL
